

Kosika Generators & Water Pumps

Powered by Robin Fuji & Honda

Commercially designed for contractors and rental yards

Generator Specifications

Kosika manufactures the finest quality generators in the world. We started with a solid foundation with the famous Robin Fuji engine of Japan. With world class engineering, Robin has built over fourteen million engines for construction, agriculture, recreation and outdoor power equipment and has been proven to last up to 50% longer over other engines. To ensure lasting productivity, Robin has established a worldwide network of parts and service centers throughout the world.

Robin industrial engines are built to meet the demanding stress of everyday operation. The compact design, copper brushless generator, full steel frame, large metal gas tank with screen fuel filter, fuel gauge, gas line shutoff with glass bowl, low oil shutoff, metal heat shield to insulate heat transfer for maximum power output, super silent exhaust all adds up to the ultimate in generators.

Every Kosika generator comes with the Robin engine guarantee for two years. With Kosika generators you know you have the right generator for your ultimate power and reliability demands.

KG 750

KG 750(S)
With oil sensor

KG 1500

KG 2400L
With oil sensor

KG 3500
With oil sensor

KG 2400S
With oil sensor

KG 5000
With oil sensor
Wheel kit included

Models KG 1500 - KG 5000 come standard with 1 240V, 30 amp, twistlock outlet and 2 120V outlets.

All units come with 12V DC outlet at 100W
