

MODULAR AUTOMATION with Auto Transfer Switches

MODULAR OPTION

Electricity

Mechanical
components

Standard A50 housing for the entire range.

MODULAR SOUNDPROOFING

The 106 module is used throughout the range (except the TM 16), extensively reducing costs. It can also be adapted as an add-on to a basic set (by authorised SDMO personnel only).

The FORMULE 2000 Range represents yet another step towards increased modularity. Using a basic generating set (compact-manually operated) and various standard option packs that can be added on to every set in the range, customers can produce soundproofed or automatic generators without any need for modification.

A carefully-designed policy of stock management has greatly improved the availability and competitiveness of all these versions. The options have been specially adapted to target outputs of 20 kVA or less.

Of course all the advantages of GENERATON 2000 have been retained, in particular the dual frequency and multivoltage functions.

3-PHASE GENSETS

kVA 50Hz	PACIFIC 2 poles	PACIFIC 4 poles	kVA 60Hz
7.5	-	TM 7.5	9
9	-	TM 11.5	13.5
11.5	-	-	-
15	TN 15	TM16	19
16	-	TM 20	22
20	TN 20	TM 30	33
